

Lotion Rich

Medicated Lotion Soap

It was the wisdom of your grandmother. Now, it's the advice of the medical community. When you wash your hands, you don't spread germs. And germs cause illness.

Washing hands means fewer employee sick days and better customer relations. Grandma's wisdom meets your bottom line.

So, how do you encourage it? Company policy? Signs in the washroom? How about a medicated lotion soap that cleans gently and fights bacteria? A moisturizing soap that feels good on your hands, with no drying or chapping. A soap that's effective, even in hard water. How about LOTIONRICH? Just lather and wipe. You don't even have to rinse!

Your employees will love it. Your customers will appreciate it. Your bottom line will glow with the LOTIONRICH difference.

DIRECTIONS

- Wet hands
- Lather
- Dry thoroughly – It's that easy!

See label for more detailed directions and precautions.
