

BRUSKE
REINHAAS
DEGREASER

Super-strength, Spontaneous Cleaner Degreaser

A powerful, all-purpose cleaner that solves cleaning problems, saving you time and money.

Release D'Grease™ Is Loaded With Advantages!

BRUSKE RELEASE D'GREASE™ is a super-strength, spontaneous, biodegradable, all-purpose cleaner degreaser with such ideal physical properties that it actually replaces a number of ordinary cleaning solutions that you are now buying.

Because BRUSKE RELEASE D'GREASE is a concentrate and you work with simple dilutions of water to adapt to so many cleaning blends, you gain the advantage of being able to work with just one cleaning agent, instead of working with several cleaning agents to do a wide range of cleaning degreasing jobs. Dollar-for-dollar, and feature-for-feature, RELEASE D'GREASE has no equal at any price. It's truly a perfect way for you to save both time and money.

Safe to use, RELEASE D'GREASE contains no phosphates. It contains no Butyl Cellosolve. It has no flash point. RELEASE D'GREASE has no fragrance. It has infinite solubility, low foam properties and a patented nonionic surfactant system.

Through simple water dilution adjustments, RELEASE D'GREASE works equally well when used in open-faced pails, hand-held plastic spray containers, heated or unheated degreasing soak tanks, mechanical cleaning devices, automatic scrubbers, steam cleaners, and ultrasonics.

RELEASE D'GREASE is a highly effective, non-hazardous chemical formulation of non-toxic water conditioners and builders plus super wetting surfactant that work together to do a superior job of dissolving and emulsifying grease, baked-on grease, carbon deposits, greasy soil, dirt, oil and soap scum.

RELEASE D'GREASE effectively, thoroughly and completely degreases as it cleans. At the same time, it prevents the redeposit of heavy grime or industrial dirt. To rinse surfaces and eliminate filmy residue, simply use ordinary tap water. This remarkable cleaner degreaser literally collects unwanted substances, moves them together and out. When diluted according to directions, this all-purpose cleaner is safe and easy to use on most surfaces: hard surfaces including plastic laminate, metals, machinery, heavy equipment, kitchen and bathroom surfaces, floors, walls, ceramic tile, porcelain, plastic, and wood. It can even double as an extraction cleaner and spotter. And it's safe enough for use on all U.S.D.A inspected food contact surfaces.

From light washing to heavy-duty cleaning jobs, RELEASE D'GREASE makes it easy to clean:

- grills, ovens, and stove surfaces
- ventilating hoods, fans and air filters
- tile or composition or cement floors
- walls, ceilings, pipes and conduits
- truck, bus, auto and tractor engines
- aircraft engines and underbodies
- light and heavy machinery
- fasteners, small or large machined parts
- conveyor rollers and parts
- file cabinets, plastic trim or plastic laminate furniture
- auto, bus, truck, and aircraft interiors and exteriors
- marine craft fiberglass or painted wood exteriors, plastic or wood interiors
- shower stalls, ceramic tile, porcelain, stainless or plastic sinks, tubs, and toilets and urinals
- shelving, counter tops, and partitions
- U.S.D.A. inspected food contact work surfaces, equipment, utensils, refrigeration units, floors and walls

Make a simple "side-by-side" cleaning comparison test and find out just how good RELEASE D'GREASE really is. Clean and degrease any "side-by-side" grimy or greasy machines or solid surfaces by using your chemical cleaner on one machine or surface and water soluble RELEASE D'GREASE on the other item. We invite you to make such a critical test because we are confident that RELEASE D'GREASE will do the best cleaning job.

There's still another advantage you'll discover when working with RELEASE D'GREASE: the advantage of keeping your cleaning equipment in tip-top shape with minimal efforts. Put RELEASE D'GREASE to the test once again and see the difference about cleaners! The well-balanced formula of RELEASE D'GREASE keeps on working even after it collects unwanted greasy matter from surfaces. It dissolves and emulsifies greasy waste and keeps this matter from setting deeply into sponges, mops, plastic buckets, or other containers. The special action of water soluble RELEASE D'GREASE allows you to clean the surfaces, then afterward, water rinse your equipment clean with little or no effort. Throw out the unwanted waste, not your cleaning equipment!

BRUSKE RELEASE D'GREASE is the all-purpose, super-strength cleaner degreaser with long-term, built-in savings and many more clear-cut advantages when compared with any number of ordinary cleaners.

"I personally guarantee it!"

Eliminate Paying Freight For Water and Drums

One 2-pack of Primary Raw Element makes 55-gallons of cleaning concentrate.

RELEASE D'GREASE is Shipped In Convenient Containers

It is available in a choice of two forms, Primary Raw Element or Pre-Blended Concentrate.

The packaged raw elements, originally developed in a three-step blending process, have now been refined into an even more simplified two-step blending process that allows you to create the base concentrate at your plant site.

Eliminate Paying Freight For Water and Drums

A single, compact unit of RELEASE D'GREASE contains two 2-gallon containers of Primary Raw Element: enough raw element to make 55-gallons of RELEASE D'GREASE concentrate. All you do is pour in the four gallons of raw element and fill your own reconditioned or unlined 55-gallon container to the top with ordinary tap water.

We Formulate RELEASE D'GREASE So You Add the Water At Your Site

This way, we're able to reduce the shipping weight of the compact four pack to approximately 47 pounds. Compare our two pack of raw element (which makes 55-gallons of blended concentrate) to the weight of any ordinary 55-gallon drum of concentrated cleaning liquid, which weighs out at approximately 520 pounds. The difference is approximately 473 pounds in shipping weight!

+ 408 lbs. water (51 gallons)
+ 47 lbs. raw material
+ drum & palette

= 520 lbs. (approximate)

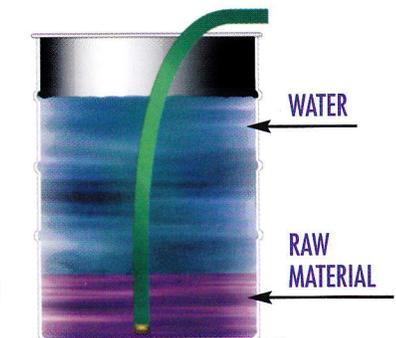

← 47 lbs. raw material

Eliminate Paying Freight For Water and Drums

Discover How Much You Can Save With RELEASE D'GREASE

All of the essential ingredients for making RELEASE D'GREASE into a blended concentrate of cleaner degreaser are contained in one compact two pack that is easy to handle, convenient to store and economical to ship. The RELEASE D'GREASE compact two pack (which makes 55-gallons) can be shipped via UPS, Fed Ex Ground, or many other widely known special delivery services. Even in the coldest weather, we can ship our regular two pack carton, as freezing will not affect RELEASE D'GREASE.

What Kind of Value Do You Place On Storage Space?

Compare the floor space it requires to store 4 two packs of RELEASE D'GREASE Primary Raw Element to the space needed for four 55-gallon drums of concentrated cleaner. A single stack of two pack cartons of RELEASE D'GREASE requires approximately 4.2 cubic feet of space for storage. The equivalent amount of other industrial cleaners shipped in four 55-gallon drums on a pallet requires 47 cubic feet of space for storage. That's more than ten times the storage space that RELEASE D'GREASE two packs require.

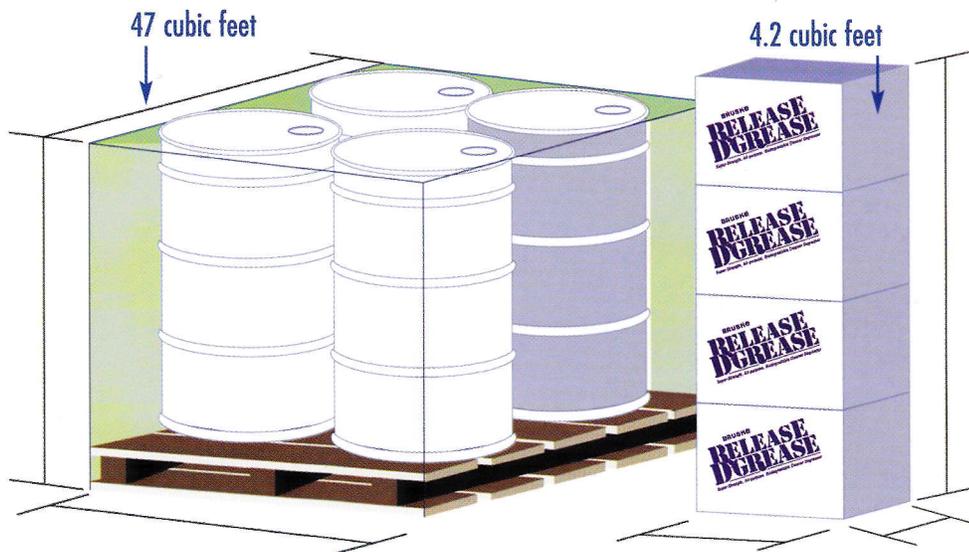

A number of two packs of RELEASE D'GREASE can even be stored in small secured areas, such as closet space, if you opt for added security and greater control.

RELEASE D'GREASE is An Environmentally Safe Formula

RELEASE D'GREASE is environmentally sound, making it possible for users to actively participate in safe environmental practices. RELEASE D'GREASE is a well-balanced formula: a water soluble, biodegradable cleaner and degreaser. It comes to you in recyclable packaging and reusable drums.

You Can Save Money When Purchasing a Cleaner-Degreaser.

Don't be misled into believing that low priced cleaners always represent a true savings. Be sure you compare all of the features: all-purpose usage, job effectiveness, efficient product packaging, a choice in packaging, freight costs, dilution ratios and space requirements. It's definitely to your advantage to order RELEASE D'GREASE.

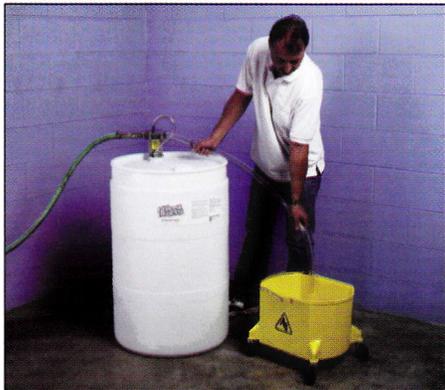

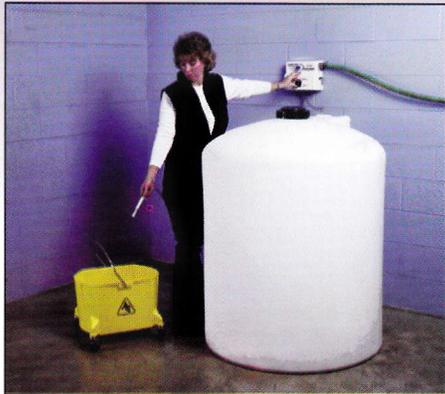

Whether your needs and consumption rates are small or large compare the unique packaging advantages of RELEASE D'GREASE in at least six ways:

1. Dollar-for-dollar savings per compact two pack of raw element
2. Cost savings on raw element bulk system purchasing
3. Reasonable unit discount pricing to satisfy low, moderate, and high volume requirement levels for added savings
4. Significant monies saved on freight and handling costs
5. Space savings and convenience
6. RELEASE D'GREASE is packaged to suit any or all of your needs as Primary Raw Element or as Pre-Blended Concentrate

Bulk Storage, Blending & Delivery Systems

Only Bruske Offers So Many Extra Advantages!

For use with RELEASE D'GREASE, specially designed bulk storage, blending and delivery systems have become an integral part of the unique customer service package provided by Bruske Products.

Bruske 200 Gallon Bulk Tank System

Stores up to 200 gallons of RELEASE D'GREASE concentrate, developed from three 2-packs (three cases of 4 gallons) of Primary Raw Element. This system features convenient storage, blending and delivery from a super durable plastic 200 gallon storage tank, water hose connection and inserted blender/regulator. From the concentrate, this system provides for measured, blended and delivered cleaner/degreaser direct to containers at a rate of 4 to 16 gallons per minute. Only 70 cubic feet of space is required to store 200 gallons of concentrate; the equivalent of 8,000 gallons when blended at a 40 to 1 dilution.

Bruske Hyatt Special Tank System

Stores up to 55 gallons of RELEASE D'GREASE concentrate. This compact system features convenient storage, blending and delivery of measured cleaner/degreaser from a blender/regulator and water hose connected directly to any 55-gallon drum. You deliver properly diluted, ready to use cleaner/degreaser directly to any size container. This compact system requires only 7 cubic feet of space to store 55 gallons of concentrate, or the equivalent of 2,200 gallons when blended at a 40 to 1 dilution.

Bruske Bulk Storage, Blending and Delivery Systems are Currently Being Supplied to Qualified Multi-drum Customers FREE of Charge

Ask your Bruske Sales Representative for details, or phone or fax the Bruske offices in Tinley Park, Illinois.

RELEASE D'GREASE comes conveniently packaged in two basic forms:

- 2 step Primary Raw Element
- Pre-Blended Concentrate (water added)

RELEASE D'GREASE is also available in a variety of containers for added convenience. You can order RELEASE D'GREASE in the form that best suits your needs.

Through special arrangements, Bruske multi-drum customers can now select the individual system that best suits their needs. This customer service program creates an opportunity for you to:

- Store RELEASE D'GREASE in convenient bulk quantities
- Store RELEASE D'GREASE in a concentrated form, ready for blending
- Blend to fully measured dilutions ready for specially selected use
- Deliver the blended liquids direct from the storage units to individual containers
- Save on valuable storage space
- Save money through bulk pricing
- Save extra money on delivery and handling costs
