

# BRUSKE RELEASE D'GREASE AND CHEMICALS™

Release D'Grease™ is a completely biodegradable, super-strength, spontaneous cleaner degreaser. It's an effective way to fight the high cost of freight, reduce handling costs, and increase storage capacity. Release D'Grease makes a full 55-gallon drum of super-strength, spontaneous cleaner degreaser from a 4 gallon case consisting of two-2 gallon containers that can be shipped anywhere via UPS or FedEx.

Release D'Grease has ideal physical properties and exceeds most performance requirements. Release D'Grease contains no phosphates and has no Butyl Cellosolve. It possesses no flash point. It has no fragrance. It has infinite solubility, low foam properties and the surfactant system is nonionic patented.

Through simple dilution adjustments, Release D'Grease works well in almost all mechanical cleaning devices. It removes dirt, oil or greasy soil from all types of hard surfaces, floors, ceramic tile, porcelain, plastic, walls, wood, metal, and metallic surfaces. It's safe enough to use on U.S.D.A. inspected food contact surfaces.
